

GRACE HOSPITAL
FOUNDATION

DONATION FACT SHEET

Your gift to Grace Hospital Foundation directly supports patient care enhancements that would not otherwise be funded by the government, and helps assure that every patient who comes to the Grace has access to the best care possible.

Current Project

Envision Our Grace. This \$3 million capital campaign will see the complete renovation and expansion of our Diagnostic Imaging department, adding a second CT scanner, a new SPECT Gamma Camera, the addition of Echocardiogram services and new ultrasound and digital X-Ray machines. Once completed the new department will be more functional for patients and will dramatically increase our capacity for testing.

COVID-19

In response to the global pandemic crisis, we established the COVID-19 Fund. The fund is used to support staff resources and patient care needs such as free bedside TV, internet, phone service, and iPads. Donations are still required so that we can be prepared for future developments or needs for resources.

Equipment

Your support provides \$250,000 each year for special medical equipment purchases including bladder scanners, wheelchairs, specialized beds, and many other critical items.

Research

Your support provides \$10,000 each year for research projects conducted on-site at Grace Hospital.

Programs

Your support provides \$20,000 each year for programs to enhance patient care such as Music Therapy and Art at the Bedside through Artists in Healthcare Manitoba. Your gift also supports many comfort care programs through our Volunteer Resources department such as teas for Grace Hospice residents, birdfeeders, and the Patient Book Cart.

Past Projects

- \$6 million to build a new Emergency Department and MRI Suite
- \$2.5 million to build Grace Hospice
- \$1 million to purchase a CT Scanner
- \$1 million to upgrade our General Surgery and Urology Surgery operating room suites
- \$700,000 to build a clinical simulation teaching lab
- \$200,000 for a VOICERA staff communication system
- \$150,000 to provide free Wi-Fi for patients and visitors
