Grace Hospital Foundation Board of Directors & Staff21

MESSAGE

from the Grace Hospital
Foundation Board Chair
& Grace Hospital Chief
Operating Officer

Without doubt we are all grateful that the year 2020 is now in our rear-view mirror. It was a year full of challenges, losses, some gains and many, many examples of creativity, heroism and resilience. We saw incredible examples of people going above and beyond and communities rallying together to support each other.

As we move into 2021, we face continuing pressures and challenges with the pandemic but now there is a sign of hope in the form of an effective vaccine against the relentless COVID-19.

What we have witnessed at the Grace Health Campus has been nothing short of miraculous. Our dedicated staff have been working tirelessly with compassion, dedication and "grace" every day, despite the high patient volumes and all of the challenges associated with being an acute care hospital that treats patients with COVID-19. Their poise and professionalism are something to behold. We could not be more grateful or more proud of our amazing Grace Health Campus staff and physicians.

Our community too, has simply astounded and humbled us. The outpouring of support and well wishes is beyond anything we could have asked for, and has been so gratefully received. Partners like the Princess Auto Foundation, Little Goat Restaurant, D-Jay's Restaurant and Olympia Diner

JEFF COLEMAN
BOARD OF DIRECTORS CHAIR, GRACE HOSPITAL FOUNDATION

KELLIE O'ROURKE
CHIEF OPERATING OFFICER, GRACE HOSPITAL

have brought food for our staff, as have groups including Old Dutch, Sargent Sundae and Food Fare. Groups like Birchwood Automotive Group and Super Lube Auto Centres have bought coffee and drinks for all staff. We have also received hundreds of individual and corporate gifts. We have used these proceeds for vital initiatives including buying iPads for patient units so that patients can FaceTime with their families. In addition, because of our donors, all patients have been able to watch TV and use the bedside phones without cost.

We have received cards and drawings from students at Bruce Middle School, Lincoln School, Nova Montessori Preschool and the Torah Tots daycare. We have received drive by salutes from the RCMP, WFPS, Canada Post, CAA and more. All of these gifts and messages have been so meaningful and so very much appreciated.

How do we express with words our gratitude for this special kindness? All we can say is thank you from the bottom of our hearts. Your support means more to us than you will ever know.

We at the Grace Health Campus continue to rise to the challenge and remain here for you. Together we will all weather this pandemic storm. The future is bright thanks to you and your support.

A Year in Review

GRACE HEALTH CAMPUS AND THE WORLD FOREVER CHANGED

The Grace Hospital mission is to coordinate and deliver safe and caring services that promote health and well-being. 2020 was a year that tested the health care system and in particular Grace Hospital as one of the three acute care sites in Winnipeg. As public health grappled with the new and intimidating COVID-19 virus, Grace Hospital rose to the challenge and continued to provide exemplary health care to Winnipeggers and Manitobans from across the province.

The journey began for the Grace Health Campus on March 12, 2020, when a COVID-19 Testing Clinic was opened in Access Winnipeg West. Things really began in earnest on March 15th when Winnipeg hospitals went into complete lock-down. Visitation became restricted and staff were required to be screened individually each day.

Dr. Owen Mooney is a critical care doctor who admitted one of the first COVID positive patients to Grace Hospital. Dr. Mooney deals with death

on a daily basis. "It is part of my job," said Dr. Mooney. "I am trained and equipped to manage and deal with families and patients with compassion and providing end of life care." While Dr. Mooney is trained to work in a critical care environment, still he said the staff were taken aback by the sheer volume of patients they were seeing. "While critical care operates at 95 – 110 % capacity at the best of times, we were not prepared for how many patients we would care for," said Dr. Mooney.

As visitation became restricted, families and friends of patients were not permitted to visit the hospital and see their loved ones. "Clinically at the bedside, for me, the isolation was the most difficult part," said Dr. Mooney. "Part of my job every day is to have family involvement with decision making. We have to make informed decisions based on treatments with families' input. COVID has really taken that ability to have that one-on-one with families away."

Not having the ability to have families involved early on in the pandemic was very hard on the healthcare staff, doctors, and nurses. "It was amazing to see how nurses and allied health professionals were a surrogate family for these people," said Dr. Mooney. "We have done an incredible amount of work in figuring out alternative ways to communicate via FaceTime and still make communication with families a part of everyday critical care."

Early on, the hospital administration connected with the Grace Hospital Foundation and expressed a vital need for iPads to assist with family and patient communication. "People had that foresight early on that it would be an ongoing necessary tool," said Dr. Mooney.

After quickly establishing the COVID-19 Fund, the Grace Hospital Foundation was able to purchase 50 brand new iPads and docking stations for patients in isolation. These iPads are still being used today and will carry us forward through the pandemic and into the future.

By April, the Grace Hospital cancelled full slates of elective surgeries in preparation of COVID-19 patients. A 21-bed unit dedicated to COVID-19 was created on the 5th floor and both the new COVID unit and ICU began to treat patients.

Dr. Mooney says the pandemic has asked a lot of the critical

care nurses who had to learn critical care on the fly. "Trying to adopt and roll out new models of care and the way we deliver health care in the ICU setting during a pandemic; some of which was necessary and some of it forced upon us, that has been a challenge," said Dr. Mooney.

"I am super proud to be part of this environment and have the unified focus and dedication in trying to make this work," said Dr. Mooney. "I have to applaud the health care administration for thinking outside the box (in particular Unit Director, Dr. Smith) in opening up PACU in that time and making the decision to shut down the OR to make that space into a completely own isolated unit in and of itself. This was unique in this province. The Grace was the first one to recognize that providing care in an open space for COVID patients was effective and efficient. It was clearly necessary."

As the spring wore on, Manitoba had a short reprieve from COVID-19 worries as July and August brought extremely low case numbers. Feeling the relief, the staff and hospital environment enjoyed a short time of normalcy. The hospital began elective surgeries again and the COVID unit was quiet.

But then as case numbers began to spike in the fall, the hospital responded again. The hospital re-opened the 5th floor COVID Unit and expanded the ICU capacity from 11 beds to 26. Visitation became restricted once again.

Even with the ebbs and flows of COVID-19 positive patients, Dr. Mooney remains hopeful for the future. "I do feel optimistic, there is a light at the end of the tunnel," said Dr. Mooney. "The vaccine and the roll out in the short amount of time is a gargantuan achievement for mankind. I do see normalcy in the future."

While we all share that hope for the future, the Grace Hospital Foundation, hospital staff and patients still need your help. To ease the visitation and financial burden on patients, the Grace Hospital Foundation for the past 10 months has been paying for all patients to receive free telephone, television and internet service while receiving care. The COVID-19 Fund, to pay for this amenity, will run dry soon. We need your support to continue providing this service and helping to alleviate the stresses of illness and recovery.

Our Community Gives Back

THANK YOU FOR FUELING OUR HEARTS

Between drive-by salutes, free meal deliveries for staff, snacks and cards of support, the Grace Health Campus staff felt all the love from our generous community.

Princess Auto Foundation

DONATES OVER 11,200 HOT MEALS TO GRACE STAFF

The staff of the Grace Health Campus thank the Princess Auto Foundation.

The Princess Auto Foundation had 200 meals delivered every day in January and February 2021, to the staff on Grace Health Campus. 11,200 nourishing meals to help our staff get through their long days. 11,200 smiles of appreciation.

It is hard to describe how grateful we are for this unprecedented gift.

We also thank all of the partner restaurants for the amazing food. Trans Canada Brewing Company, Earls Kitchen & Bar, Laura's Homestyle Kitchen and Café Pearl.

Thank you for your support!

PICCA FAMILY GRATEFUL FOR KINDNESS AND CARE

She was the epitome of a devoted grandmother and mother. Selfless. Giving. Had the biggest heart ever. That is how Vanessa Picca describes her mother-in-law Shirley, who passed away from COVID-19 on December 4, 2020. Shirley Picca was in the Grace Hospital ICU.

Shirley began feeling under the weather in early November when she initially got tested for COVID-19. Her test result came back negative, but under the advice of her employer she remained at home. While at home, she started having difficulty breathing, and that is when she decided to come to Grace Emergency Department. Upon arrival to the Emergency Department, Shirley was tested again for the virus and the result was positive. That Remembrance Day, Shirley was admitted to the Grace Hospital COVID-19 Unit.

Vanessa describes her mother-in-law as healthy. She wasn't on any medication and was working six days a week at a local grocery store. She also took her three grandchildren (Adley, Anniston

SHIRLEY PICCA WITH GRANDAUGHTER ANNISTON PICCA
PHOTO SUPPLIED BY PICCA FAMILY

and Calla) to school every morning so that Vanessa and Shirley's son Daniele could head to work. "She was very active and very involved," said Vanessa. "If people believe those who are dying are sick or in a care home... that is just not the case."

Shirley was in hospital for four days and she and the family thought she was doing well. Friday night, Shirley was on FaceTime, talking about plans for after the hospital stay and whether the family could bring her a crossword puzzle book. "We thought she was getting better," said Vanessa recounting that night. "And so it was a big shock when Saturday she was placed on the ventilator and would not come off."

"Every day was a rollercoaster," said Vanessa. "Even in the course of a day, we would get good news and then bad news."

Due to the visitor restrictions, the family would not be able to visit Shirley in hospital. This made the iPads and compassion of the doctors and nurses essential to the family's ability to communicate and understand what was going on with Vada, how the grandchildren affectionately referred to their grandmother.

"The doctors were amazing," said Vanessa. "They knew us by name." They would FaceTime multiple times a day, which meant a lot to the family.

"Not being able to be there was the most heartbreaking thing," said Vanessa. "We had some very special nurses that would really take the time to say they were sorry we couldn't be there, but assured us they were taking care of Shirley as if she was their own. That's the kind of care they give."

Shirley would be on the ventilator for 3 weeks when she became non-infectious and was moved to a non-COVID Unit. On her last day, Vanessa and Dan were able to visit Shirley at Grace Hospital to say their goodbyes.

STAFF IN THE GRACE ICU RECEIVE GIFTS FROM THE PICCA FAMILY VIA THE KINDNESS PROJECT

"We were lucky to be able to see her," said Vanessa. We know that it was a gift to be able to see her."

While at home,

the granddaughters felt they needed to do something. "We felt helpless at home," said Vanessa. "We could hear the exhaustion and we knew the doctors and nurses needed our support."

The girls started collecting donations in giftcards and officially launched their year long idea in the making, "The Kindness Project Wpg". To date, the Kindness Project Wpg has donated over \$2,400 in giftcards and gift boxes to the staff at the Grace ICU.

"We wanted to give back," said Vanessa. "And teach our kids the importance of giving back. Our kids will come into circumstances where things are sad. We want them to think about how they can make a difference and turn it into a positive. This is who Shirley was. We are excited to do this in her honour."

Ultrasound Project

KINSMEN CLUB OF WINNIPEG PROVIDES FUNDS FOR ESSENTIAL DIAGNOSTIC EQUIPMENT

Ultrasound has become essential to the way doctors and nurses assess patients. A modern-day diagnostic tool, ultrasounds have almost replaced the stethoscope. Not only are they truly effective, but equally as important they are fast.

With an ultrasound, caregivers can directly see the heart and visually tell if it is failing or stressed. Ultrasound allows them to see the fluid inside the lung and whether it has collapsed. When a patient has shock, ultrasound can be used to see if there is a loss of blood or need for fluid. Ultrasound can also diagnose pregnancy and be used as a guide for invasive procedures to make them safer. Point-of-care ultrasound has become the standard of care.

That is why during this pandemic, the Grace Hospital identified an urgent need for two ultrasound machines; one for the Emergency

Department (ED) and one for the Intensive Care Unit (ICU). The patient acuity and capacity in both the ED and ICU have increased by 180-220% due to COVID-19. With the increase in isolation requirements paired with the time it takes to properly clean the devices, accessibility to the equipment has become paramount.

In January 2021, the Grace Hospital Foundation contacted our good friends at the Kinsmen Club of Winnipeg and asked them if they would consider purchasing two ultrasound machines at a cost of \$80,000. They instantly agreed.

The Grace Hospital could not possibly be more grateful. The Kinsmen Club of Winnipeg has a rich history of community support that goes back many decades. Their work has had a lasting impact on our city and our province; and we are proud to say that impact will carry us forward.

Thank you Kinsmen Club for being there in our time of need.

Wawanesa Insurance Donates \$25,000 in support of COVID-19

Wawanesa Insurance has helped fund an ultrasonic cleaning machine for Grace Hospital's Emergency Department. The machine can sanitize an entire patient room in 11 minutes! This new unit will supplement the Grace Hospital's existing unit which has been diverted primarily to the Intensive Care Unit and Operating Rooms due to COVID-19.

Wawanesa
Insurance

With Emergency Department volumes up 180-220%, having a dedicated machine in the ED will help assure that patient rooms are ready for use by patients much faster. This will have a major impact on the care we provide.

Our longtime friends at Wawanesa Insurance supported this purchase with a gift of \$25,000. Wawanesa Insurance remains one of our strongest and most dedicated partners. Since the Foundation's inception, Wawanesa Insurance has donated \$245,000 to the Grace in support of patient care. Thank you Wawanesa Insurance!

Donor Wall

RECOGNIZING OUR COMMITTED COMMUNITY

The donor wall at Grace Hospital is a testament to the kindness of those who have supported patient care at the Grace through their generous donations. Since its inception in 1990, the Grace Hospital Foundation has raised over \$30 million to support patient care enhancements. These funds support the purchase of vital equipment and facilitation of patient programs. It is with thanks to our caring community that Grace Hospital Foundation can affect patient care at a grassroots level.

For those donors who wish to leave a permanent legacy at the Grace, the donor wall recognizes and honours families for their generosity and commitment to Grace Hospital.

In 2020, Grace Hospital Foundation redeveloped the Donor Recognition program which included the design and installation of a brand-new donor wall at Grace Hospital. Located in the main front entrance and lobby, the donor wall can be viewed by patients, visitors and staff.

In contrast to the previous wood framed

and bronze lettered recognition, the new wall emulates a modern look and feel. When planning the installation, it was important the wall could be a timeless design that would carry the Grace Hospital Foundation and its donors into the future.

In addition to the updated design, the donor wall is also economical which allows the Foundation staff to update and refresh on an on-going basis. In 2020, the Foundation reached a record milestone in gaining over 850 new donors. That's 850 new community members who are dedicated to ensuring patient care at the Grace is the best in the city.

The new donor wall celebrates the hospitals history and milestones, and highlights the current and past projects of the foundation. It is a place for patients, staff and visitors to pay tribute to those who have supported patient care over the years.

Words cannot express how grateful we are for everyone in our community and their dedication and kindness.

Envision our Grace

►► More Capacity More Advanced Technology More Peace of Mind

When a problem can be seen clearly, it can be treated more effectively. That's why diagnostic imaging is an essential focus now that Grace Hospital has transitioned to one of only three acute care facilities in Winnipeg.

Our goal is to redevelop diagnostic imaging at the Grace, making our hospital a more valuable asset for the entire Winnipeg health region. With your help, we will add new equipment and cutting-edge technology. We will enlarge and modernize the entire department.

For patients, these improvements will mean greater peace of mind during life's most stressful moments. They will know their treatments are based on the best diagnostic testing available.

Planned Improvements

SPECT-CT Gamma Camera: This state-of-the-art camera will be used to create 3D pictures of internal organs, primarily for cancer diagnosis. It can also be used to reveal hidden bone fractures and blocked blood vessels, and for specialized cardiac imaging.

Additional CT Scanner: A second scanner will help to shorten wait times, avoid bottlenecks and provide back-up as patient capacity at the Grace expands. The new scanner will also have additional capabilities, making it possible to perform more types of examinations.

Additional Ultrasound: We will develop two new rooms for ultrasound as we increase the number of machines from three to four. These improvements will decrease wait times for modes of imaging that are in high demand in acute care settings.

Digital X-Ray: All of our radiology equipment will be upgraded to fully digital imaging. This will mean less exposure to radiation and faster access to high-resolution images. When necessary, there will be immediate access to images right at the patient bedside.

Cardiology: Echocardiogram services will be added as current cardiac testing (EKG and Holter Monitoring) is relocated to the new department.

As one of three acute care facilities in Winnipeg last year our patient volume increased by 22% and our volume of diagnostic tests increased by 20%.

Expanded Imaging Services

Picture the Benefits

More Tests, Better Tests: When this project is completed, our hospital will be better equipped for our growing role in the health care system. With the increase in emergency patients alone, the Grace will conduct 10,000 additional scans next year. In total, we will conduct over 80,000 tests in 2020, and more as our services expand.

More Precision in the Operating Room: New imaging technology will help surgical teams see hidden damage and pinpoint the location of cancerous tumors. Real time imaging will be available right in the operating room, helping a surgeon locate a kidney stone or insert hardware to stabilize a fracture in the perfect spot.

A Better Patient Experience: The redeveloped department will be bigger, brighter and more attractive. Patients will have more privacy and comfort.

Faster Answers for Surgery: Over 10,000 surgical procedures are conducted at the Grace each year, including 24-hour emergency orthopedic and general surgery. With these improvements, our surgeons will have faster access to the data they need.

The Plan

This renovation will provide the space and equipment to support our patients now and into the future.

2018/2019

By the Numbers

17,180 CT	7,017 MRI	2,669 Nuclear Medicine
1,486 Fluoroscopy	35,698 X-Ray	10,624 Ultrasound

Our Capital Campaign Goal:

\$3 Million

You can make a difference by making a gift.

In Memoriam

EDWARD (ED) DANYLCHUK

Quietly and peacefully at the Grace Hospital, with his wife Marjorie and close family by his side, Ed slipped away on Wednesday, September 30, 2020.

Ed was born in Winnipeg on March 6, 1936. He and his younger brother, Bernard, were the children of John and Bernice Danylchuk.

Ed was an active child who took a great interest in sports. In 1955 and 1956, Ed played for the Winnipeg Rods Football Club, helping the team to become Canadian Junior Champions and for which he, and the team, were twice (1996, 2009) inducted into the Manitoba Sports Hall of Fame.

After Ed's parents moved to California in 1956, he married the love of his life, Marjorie McDougall in 1957. They had four children: Bruce, Sandy, Doug and Sharon.

Ed's interest in sports was soon eclipsed by his strong business and entrepreneurial spirit. He and Marge had established Crossroads Oils, and Ed was the proprietor of several Pacific 66/Tempo gas stations, along with growing a

successful trucking business, and investing in car dealerships, including Lone Star Mercedes-Benz in Winnipeg.

In 1981, Ed established Peterbilt Manitoba as Manitoba's first full-service Peterbilt truck dealership. In 1987, he also acquired Calgary Peterbilt, and with the help of his close friend and respected operating partner, Doug Fach, the business grew to include locations in Red Deer, Lethbridge, and Medicine Hat, and is now known as Peterbilt of Southern Alberta.

Ed had enjoyed riding motorcycles (primarily Harley-Davidson), and he and Marge opened Lone Star Harley-Davidson in Winnipeg in 1995. They both experienced many exciting motorcycle trips together. Ed was also a long-time member of the Manitoba Masonic Order and Khartum Shriners. He enjoyed the camaraderie of being part of the Shriners Motor Patrol and The Royal Order of Jesters.

In his later years, Ed travelled the world extensively with Marge, including many visits to San Diego, and spending time hunting and fishing with friends, and enjoying coffees at Sals.

More recently, Ed took a keen interest in collecting classic cars and loved hearing the auction hammer fall on his bid at a

variety of car auctions.

Ed and Marge also became known for their philanthropy. They were major supporters of Diabetes Canada, and attended the Diabetes Canada Best Banting Gala Dinner every year, helping to raise funds to ensure children with Diabetes did not miss out on attending Diabetes Summer Camp in Lake of the Woods, ON.

But the cause dearest to Ed and Marge's heart was Grace Hospital. Marge has been on the Board of Directors of Grace Hospital Foundation for 20 years, and through Lone Star Mercedes-Benz, were the title sponsors of the Grace Gala for many years. In 2015, Ed and Marge donated \$3.25 million to the Grace to support the construction of the Grace's new MRI Building and Emergency Department. In acknowledgement of this unprecedented generosity, the Emergency Department was named the Edward & Marjorie Danylchuk Centre and the Diagnostic Imaging facility the Edward & Marjorie Danylchuk MRI Building.

Edward and Marjorie Danylchuk with Premier Brian Pallister Grand Opening of the Edward & Marjorie Danylchuk Centre, June 2018

GRACE HOSPITAL FOUNDATION EVENTS

▶▶ VIRTUAL GRACE GALA

Originally scheduled for May 14, 2020, the in-person Gala was postponed and converted to a virtual gala which was held in our guests' living rooms on September 30, 2020.

The gala honoured R.W. (Bob) Cunningham with the 2nd Annual Pearl McGonigal Lifetime Achievement Award. Bob Cunningham is a business leader and philanthropist, whose efforts have left an indelible mark on his city and province. Aside from his many business achievements, Mr. Cunningham has been a tireless champion for many worthwhile causes, including Cancer Care, Upper Fort Garry Historic Park, University of Manitoba, and St. John's Ambulance. He has been an active supporter of Grace Hospital Foundation for several decades, both as a donor and volunteer.

▶▶ JOE AIELLO BOCCE BALL TOURNAMENT

(LEFT - RIGHT) JOE AIELLO, TARA PATRICK, DAN JOHNSON, DIANE SCOTT, CHERA MIKOS & TREVOR LAFORTE (WINNING TEAM - THE BOCCE PACT, WINNIPEG ABORIGINAL SPORT ACHIEVEMENT CENTRE)

The low cases of COVID-19 in Winnipeg during the summer months allowed for the 2nd Annual Joe Aiello Bocce Ball Tournament to proceed with restrictions.

Selling out in days, the Bocce Ball tournament invited friends of the Grace Hospital to gather on the lawn of Sturgeon Creek park for a day filled with fun, some sun, laughs and bocce ball. All proceeds raised from this event went towards the Envision Our Grace Capital Campaign to redevelop the Diagnostic Imaging Department at Grace Hospital.

Congratulations to *The Bocce Pact* - the team from Winnipeg Aboriginal Sport Achievement Centre for winning the whole dang tournament!
